ablesafe.com

When designing our safe, we start from the inside, where it matters most. This design utilizes our patented **Ultra-Fold Body System™** and **Fry Gard™** deep recessed door. Add our unique 1.5" negative heat transfer, **Thermo Barrier Interior™** and you have the most secure/fire resistant safe in its class. Then again, it's in a class all by itself.

Think inside the box.

- Packaged in Four Seperate Boxes
- No Moving Equipment Required
- Easily Installs Up or Down Stairs
